

Multispecialty Community Provider

- Vision and Next Steps

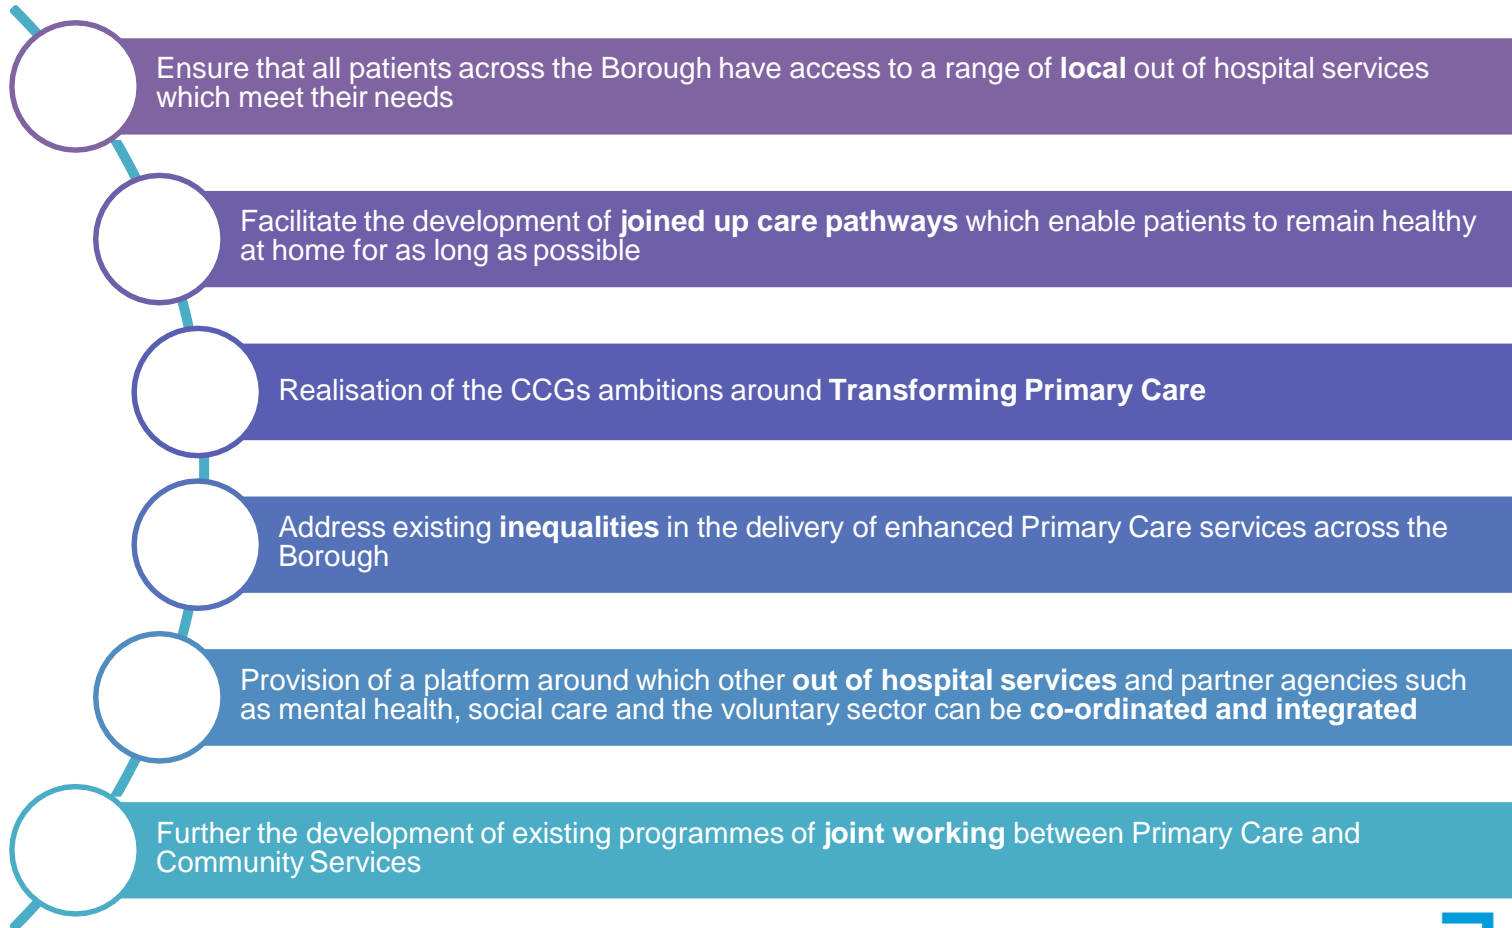

2nd February 2017

Introduction.

- Developing an MCP is our strategy for transforming Primary Care across the Borough, specifically delivering on the standards set out in the London Strategic Commissioning Framework for Primary Care.
- It will also enable us to address a range of other challenges affecting the health and social care sector in Wandsworth.

Principles.

What will change for patients

- Easier access to community services and more joined up care between GPs and Community services, mental health, social services and voluntary services
- Patient and carers being able to control the management of their care through self management and personalised care plans
- Easier process for patients at high risk . All high risk patients and carers to be made aware of what to do in a crisis
- Care will be delivered close to the patients home rather than in the hospital

Who has been engaged in this process

- Health and social care professionals
- PPI groups and Patient forums across localities
- Healthwatch
- Primary Care
- Pharmacy
- Acute and community colleagues
- Voluntary sector
- Mental health
- Nursing Homes
- Strategic development between the CCG and MCP Lead – PPI to be involved in these discussions at the appropriate time to support with development of pathways

Patient and Public Involvement

- GP federation has a PPI lead to engage with members of PPI groups across localities
- Representation at the Community Adult Health Service procurement - PPI and Health-watch to be present on the interview panel
- Care planning involvement
- Stakeholder meeting with all Providers including PPI in the future
- Patients and carers will be given feedback on the service through patient satisfaction surveys and more in-depth interviews

Current Model.

‘The MCP model will evolve over time. The initial version will form the infrastructure around which other services can be aligned.’
